## Focused on teaching and learning.

Start with the challenge you want to address. We will help bring suitable products, suppliers and specialist input together.

HOW WE CAN HELP

# The right technology. The support to match.

From day-to-day IT requirements to device and network upgrades or onboarding a new school, Fortem coordinates the technology and specialist partners you need.

### Devices and learning technology

Choose suitable devices, brands and models for students at every stage of learning, with preparation and deployment support coordinated around your needs.

### Network infrastructure

Review and optimise existing networks or plan a replacement, with specialist partner input to keep teaching spaces connected to essential apps and data.

### Digital safety and security

Filtering, monitoring, access control and security solutions, with specialist partner guidance to protect your students and data.

### Servers and storage

Secure, scalable servers and storage support teaching and administration, with resilient platforms for critical systems, applications and data.

### Software and licensing

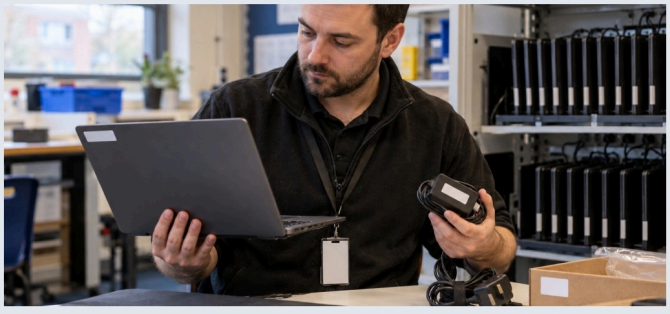

Microsoft 365, curriculum, safeguarding and security software. Licence reviews, renewals and trust-wide purchasing help maintain compliance, clarify entitlements and prevent reinstatement costs.

### Sustainable technology

Refurbished devices, trade-ins and repairable models help stretch technology budgets. Where suitable, your IT team can service devices in-house to reduce costs and avoid unnecessary replacement.

### Vendor management

Vendor options and accountability, coordinated by one Fortem contact.

SCHOOLS

# Ready for the school day.

## Technology for every school

Primary and secondary schools and sixth forms need secure, reliable IT for teaching, learning and administration. We help source devices, networking, safeguarding, cloud services and backup, with specialist support coordinated through our partners.

Shared devices and displays should be easy to use. We help choose, replace and deploy suitable equipment, including accessories, storage and support.

**Prepared and delivered around lessons, examinations and the wider school calendar.**

## Support within your budget

Trade-in programmes, leasing and refurbished devices can help limited budgets go further. Refurbished options can include a two-year warranty, subject to model and supplier terms. We will confirm device condition, availability and warranty before you order.

MULTI-ACADEMY TRUSTS

# Your trust. Your approach.

Each trust has its own approach to technology, procurement and standardisation. We work around your priorities and responsibilities.

## Support that fits the way you work.

## Autonomy or trust-wide standards: we support both.

### Flexible by design

Some trusts empower schools to choose the devices and tools that support their teaching. Others standardise technology across the trust for consistency and efficiency. We work with central teams and schools to understand existing responsibilities, requirements and good practice before recommending a solution.

### Support at every stage

From replacing a few devices to a trust-wide refresh, we take time to understand your goals, challenges and current environment. We advise on suitable solutions, procure technology and coordinate suppliers and deployment partners across one or several sites. Changes are planned around the school calendar.

**Changes scheduled around school needs, to minimise disruption to teaching and learning.**

CONNECTED LEARNING

# Dependable connectivity. Across your whole estate.

Older buildings, shared devices and busy teaching spaces place varied demands on your network. We work with your IT team to coordinate the right equipment and specialist support.

## From network review to agreed delivery checks.

### 01 Review

Coordinate specialist assessments of coverage, usage and demand.

### 02 Propose

Recommend suitable wireless, switching and equipment options.

### 03 Coordinate

Schedule partner delivery around lessons, examinations and site access.

### 04 Follow up

Confirm delivery against the agreed scope and responsibilities.

## Buildings. Devices. Daily demand.

Support around your teaching spaces.

PEOPLE, SYSTEMS AND DATA

# Supporting safer learning.

The right products and specialist expertise, tailored to your education team's needs.

## Bringing people and technology together.

### Safer digital learning

Filtering, monitoring and access tools must suit your setting. We connect safeguarding and IT teams with suitable products and specialist partners, clarifying options, responsibilities and support arrangements.

### Operational resilience

System failures can disrupt teaching, administration and access to information. We help source backup and recovery solutions, coordinate specialist advice and clarify partner responsibilities, timelines and agreed checks.

FURTHER EDUCATION

# Technology for how students learn.

Practical courses need suitable devices, software and network capacity. High-performing IT supports the learning experience and helps attract and retain students.

### Specialist learning environments

We source suitable equipment and coordinate connectivity for workshops and specialist teaching spaces based on your team's requirements.

### Across the college

Across the college, we support devices, displays, software licences and Wi-Fi, coordinating replacements and delivery around teaching and site access.

## Classrooms. Workshops. Shared study spaces.

Fortem coordinates suppliers and specialist partners for individual orders and larger refreshes.

SPECIALIST SETTINGS

# Guided by your learners' needs.

We build on your staff's understanding of accessibility, communication and individual learning needs.

### Shaped by your setting

Like any school, special schools need reliable IT for teaching and learning. We build on staff insight to source accessible tools and durable devices. Photos, video and digital records can capture progress where traditional assessments are less suitable. Partner support helps with wear, damage and replacement.

### Practical solutions

We translate requirements into suitable purchasing options, discussing suitability and support before wider orders. Where possible, we can also arrange trials or demonstrations.

## Support centred on each learner

Alternative provision has distinct routines and access requirements. We coordinate suitable technology and specialist support around your setting.

INDEPENDENT SCHOOLS

# Supporting the whole school.

Flexible, high-performance IT supports teaching, learning and the wider student experience. We coordinate reliable devices, secure connectivity and specialist suppliers around the school calendar.

SUPPORT ACROSS YOUR SCHOOL

## Teaching and learning

Reliable devices, cloud services and safeguarding tools give staff and pupils access to the technology they need. We help match equipment and support to your setting.

## Beyond the classroom

Administration, boarding and communication with parents place different demands on IT. We coordinate secure access, cyber security and resilient infrastructure around those needs.

**Planned around term dates, boarding arrangements and site access.**

One named Fortem contact coordinates suppliers and specialist partners.

FROM CONVERSATION TO DELIVERY

# One clear point of contact.

Fortem coordinates suitable options, suppliers and specialist partners around your agreed requirements.

**01** **Understand**

We listen to your challenges, priorities and what already works.

**02** **Propose**

We identify suitable products, services and purchasing options.

**03** **Plan**

We agree scope, costs and responsibilities around the school calendar.

**04** **Coordinate**

We bring suppliers and specialist partners together for preparation and delivery.

**05** **Follow up**

We stay in touch to support supplier queries and future requirements.
